PROFILE SUMMARY As a skilled web developer with expertise in building modern, responsive websites, I bring a strong technical aptitude and a passion for creating innovative solutions to complex problems. With experience in a range of front-end and back-end technologies such as HTML, CSS, JavaScript, React, Node.js, and PHP, I have a deep understanding of the full web development stack. I am committed to writing clean, efficient code and have a proven track record of delivering high-quality projects on time and within budget. Able to effectively self-manage during independent projects, as well as collaborate in a team setting.

TECHNICAL SKILLS **Programming Languages:**

- JavaScript, PHP

Frontend Frameworks:

- React,Vue.js

Preferred Tech Stack:

- MongoDB, Express, React, Node.js

SOFT SKILLS

- Able to communicate effectively, both written and verbal, with experience in client-facing roles
- Able to analyze issues and provide innovative solutions.
- Highly organized with exceptional time management skills
- Collaborative team player with a track record of successful project delivery
- Adaptable; able to quickly learn new technologies and work in fast-paced environments.
- Passionate about continuous learning and personal growth.

WORK EXPERIENCE

Apr 2019 — Present **Fullstack Web Developer, Nojo LLC** Nairobi

As a co-founder of Nojo, I design and develop front-end layouts for web applications and sites. My expertise in implementing responsive design and optimizing web pages has resulted in improved user experiences and increased conversion rates. I collaborate with designers, project managers, and other developers to ensure the successful delivery of web development projects.

Roles

- Designs, develops, and deploys front-end layouts for web applications and sites.
- Implements responsive design and optimized web pages for faster loading times, resulting in improved user experience and increased conversion rates.
- Designs and maintains robust databases using SQL and NoSQL technologies to ensure the scalability and reliability of web applications.
- Creates custom WordPress themes to provide clients with highly customizable and easy-to-use content management system experience.
- Improves website security by implementing authentication, authorization, and encryption protocols, thereby preventing data breaches and unauthorized access.
- Implements various third-party APIs such as payment gateways, social media integrations, and Google Maps to enhance website functionality and user experience.
- Works collaboratively with designers, project managers, and other developers to ensure the successful delivery of web development projects.
- Conducts thorough testing and debugging of web applications to ensure that they are free of errors and meet the required standards.
- Maintains and updates existing client websites and web applications, ensuring that they remain up-to-date with the latest trends and technologies.

- Provides technical support to clients and users, addressing issues and resolving problems in a timely and efficient manner.

INTERNSHIPS

Apr 2020

Software Developer Intern, Tangazo Letu

Nairobi

Contributed to the development and launching of the SpotCash Mobile Banking System, a Tangazoletu Mobile Banking platform used by more than 70 formal and registered financial institutions ranging from Banks, Microfinance Institutions and SACCOs in Kenya.

Roles

- Assisted with the development and testing of the SpotCash Mobile Banking System
- Provided support in troubleshooting and debugging issues in the system
- Participated in code reviews and contributed to the improvement of the system's functionality
- Collaborated with senior developers to ensure the smooth integration of the system with core banking systems, telecommunication companies infrastructure, and mobile money transfer systems
- Conducted research on emerging technologies and best practices to help improve the system's performance and user experience
